SUBJECT

“The Gold Line and its Effect on the Commercial Real Estate Market”

Presenter: Don Penman, City of Arcadia Manager

If the City of Arcadia approves a grade separation and its associated costs, the Arcadia Gold Line station will be located southeast of the intersection of North First Avenue and East Santa Clara Street, a short block away from the main commercial area on Huntington Drive. The station would have side platforms, with access from the northwest end of the platforms via the corner of North First Street and East Santa Clara Avenue. Come to hear about how this extension into Arcadia will affect both the Residential and Commercial areas of our local real estate market.

Come and learn about these points and more at the mixer!!!
